NEWSLETTER DECEMBER 2024

Season's Greetings and Highlights of 2024

As 2024 draws to a close, we reflect on an inspiring year at Digital Futures, marked by impactful projects, collaborations, and events that continue to shape the future of digital technology and innovation...

Karl H. Johansson, Director Digital Futures concludes the past year

Updates: New Calls, Funding Opportunities, and Digital Futures Progress

A new call for flagship projects will open in early 2025, with selected initiatives starting in January 2026. Seed funding of 100,000 SEK will also be available for the first ten ERC application submissions, awarded on a first-come, first-served basis. Additionally, the ISPP Mobility Grant will return as a year-round opportunity, and strategic workshops for the Digital Futures Retreat are planned for spring 2025 to advance critical projects...

Seminar Recap: Digital Futures for Education – Knowledge, Sense, and Sensibility in the Age of AI

On November 27, the Digital Futures for Education series hosted a debate, bringing together two distinguished professors and an engaged audience to explore the evolving relationship between education, technology, and professional judgment in the age of artificial intelligence (AI).

The debate featured Jonna Bornemark, Professor of Philosophy at Södertörn University, and Nina Wormbs, Professor in the History of Technology at KTH. Both are well-known Swedish intellectuals often heard on the radio and elsewhere...

Integrating Psychology and AI: Robert Johansson on Machine Psychology and the Path to AGI

Robert Johansson is an Associate Professor at Stockholm University and a faculty member at Digital Futures. He is the creator of Machine Psychology, a new interdisciplinary field that combines insights from learning psychology and adaptive AI systems. Robert recently presented his second PhD thesis, this time in computer science, titled Empirical Studies in Machine Psychology, at Linköping University...

Call for Abstract Deadline: 18 December 2024

Welcome to the 2nd Digital Futures Young Scientist Conference on 20 February 2025!

Join us for a single-day event where PhD students and postdocs working with Digital Futures affiliated faculty members have the opportunity to showcase their ideas during poster sessions.

Attend a keynote focusing on the benefits and risks of AI and join a workshop with a TEDx coach giving attendees a set of tools towards better presentation skills. The Wallenberg Initiative will also host a panel discussion on start-up funding.

For submission guidelines, registration (no cost), program, venue and questions go to Digital Futures Young Scientist Conference website.
