AI can detect infection before it's too late!

Researchers from KTH, in collaboration with Neonatal care at Karolinska University Hospital, have developed an advanced AI system that can detect infections in patients, before conventional symptoms appear. The project "Explainable Machine Learning for Early Warning Systems" is funded by Digital Futures and led by Saikat Chatterjee, Associate Professor at KTH and member of Digital Futures Faculty.

Revolutionary breakthrough in Programmable Matter: Solid-liquid phase change pumping unleashes unprecedented shape-shifting abilities

In a groundbreaking study, Kerem Kaya and others in the team of Digital Futures researchers Danica Kragic and Wouter van der Wijngaert have unlocked the full potential of programmable matter by introducing a cutting-edge method called "solid-liquid phase change pumping." Overcoming limitations in existing approaches, this innovative technique allows for free-form transfiguration and autonomous movement of solid objects with sub-millimetre precision.

The study entitled "Programmable Matter with Free and High-resolution Transfiguration and Locomotion" (Article DOI: 10.1002/adfm.202307105) was published on 24 December 2023 in the high-impact journal Advanced Functional Materials.

Ming Zhan

Bilge Mutlu

Guessing decoding for CRC is a new research field and has potential to be applied in future smart factory, says Ming Zhan

Meet Ming Zhan - Digital Futures Scholar-in-residence from August 2023 to March 2024, hosted by Ragnar Thobaben, Associate Professor at KTH and a member of the Digital Futures Faculty.

[Interview with Ming Zhan](#)

Scholar-in-residence Bilge Mutlu: Do the highest quality work you can, and others will see the value in your work!

Meet Bilge Mutlu - Digital Futures Scholar-in-residence from December 2023 to January 2024, hosted by Digital Futures faculty member Iolanda Leite.

Open Calls

Open call: Digital Futures Summer Research Internship Programme (SRI)

The SRI programme is directed toward students on the bachelor's and master's levels (at KTH, Stockholm University or RISE), who will have the opportunity to conduct research under the guidance of researchers affiliated with Digital Futures

Application deadline: 1 March 2024

[Find out more on SRI Programme](#)

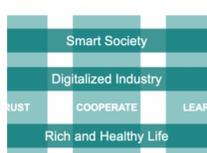

Photo: Unsplash

Open call: Scholar-in-Residence programme

Providing scholars at non-Swedish universities with financial support to enable short and longer-term visits to Digital Futures. How this time away from a home institution is used is flexible and for the scholar-in-residence to decide. Applications are possible every three months.

Next deadline: 4 March 2024

[Scholar-in-Residence programme](#)

Digital Futures Strategic Research Matrix

Open call: ISPP Mobility Grants

ISPP (Industrial and Societal Partnership Program) Mobility Grants are targeted at preparing/initiating new interactions between Digital Futures faculty and representatives of ISPP members. Applications are possible every three months.

Next deadline: 15 March 2024

[Open call: ISPP Mobility Grants](#)

Digital Futures seminars & workshops

Workshop on Digital Solutions for Animal Science

When: 7 February 2024, 10:00-15:00
Where: Digital Futures hub
Interdisciplinary workshop, bringing together researchers in animal sciences from SLU and researchers in digitalization at KTH, Stockholm University and RISE.
Organizer: Hedvig Kjellström, Professor at KTH, Guest Professor at SLU, and Digital Futures Faculty.

Digital Futures Lunch on 14 Feb, 2024

When: 14 Feb 2024, 12:00-13:00 CET
Where: Digital Futures hub
Registration is open for Digital Futures Faculty members only.
Digital Futures Faculty lunch is a great time to get together, enjoy a nice lunch, network and find out what's happening in the community...

Digital Futures for Education: What is the impact of AI on university teaching and learning?

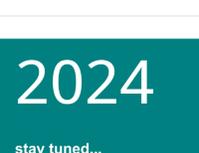

When: 6 March 2024, 13:00-14:30
Where: Digital Futures hub or Zoom
Moderator: Professor Arnold Pears, Unit of Learning in STEM at KTH
Speaker: Matti Tedre, Professor at the School of Computing, University of Eastern Finland

[Digital Futures for Education: What is the impact of AI on university teaching and learning?](#)

Archive - recorded talks
Did you miss any of all the great lectures, curtain talks, Fly-high Fika or Dive-deep lunch seminars?
Not to worry, in **Archive - recorded talks**, you can watch most of our talks again.

About us
Digital Futures is a cross-disciplinary research center that explores and develops digital technologies. We bring solutions to great societal challenges, in Sweden and globally. We generate knowledge, innovations and future leaders of high industrial relevance and strategic importance. Digital Futures is jointly established by KTH Royal Institute of Technology, Stockholm University and RISE Research Institutes of Sweden.
