Young Scientist Conference

February 20, 2025 @ Digital Futures, Osquars backe 5, Stockholm

Digital Futures is thrilled to announce the second Digital Futures Young Scientist Conference! The conference is designed exclusively for PhD students and postdocs working with Digital Futures faculty, offering a unique platform to showcase your research, ideas, and innovative solutions in the realm of digital transformation. The conference will provide an exciting opportunity to connect with fellow colleagues, build new interdisciplinary collaborations, and explore new perspectives on digitalization! Join us for vibrant discussions, poster presentations, inspiring keynote on the benefits and risks of AI, and join a workshop with a TEDx coach giving attendees a set of tools towards better presentation skills. The Wallenberg Initiative will also host a panel discussion on start-up funding.

Scope

Submit your abstract about a research project at any stage of development. Topics of interest include (but are not limited to):

- Digitalization and society
- Digital technologies for human choices
- Digitalization in education
- Digitalization in the natural sciences
- Digitalization, sustainability, and the environment
- Foundations of digitalization
- Digitalizing privacy and security
- Digitalization in healthcare and medicine
- Digitalization in industry and engineering
